

Program 3: Build an interactive webpage using Bootstrap CSS.

Aim: To Build an interactive webpage using Bootstrap CSS.

Algorithm:

Step 1: Initialize Webpage

- a. Load Bootstrap CSS and JavaScript.
- b. Create a navigation bar with links.
- c. Add a container for user interaction.

Step 2: User Input Handling

- a. Create an input field for the user to enter their name.
- b. Provide a button to submit the name.

Step 3: Display User Greeting

When the button is clicked:

- Retrieve the input value from the text field.
- Update the text in the greeting section with “Hello, [name]!”.

Step 4: Bootstrap Components

- a. Add an alert message for user notification.
- b. Include a button to trigger a modal popup.
- c. Design a modal that displays a message and a close button.

Step 5: Footer Section

Add a footer with copyright information.

Step 6: Event Handling

Ensure that Bootstrap components such as the modal and navbar toggling work as expected.
